*To The Allegheny County Board of Legislators:*

*Attached are the proposed Legislative goals for the current Board of Legislators as recommended by the Ways and Means Subcommittee on Legislative Goals. These were passed through the Ways and Means committee and have now been submitted to you for your approval, revision, or rejection. Recommendations can be submitted to the Ways and Means Committee or to Ron Truax. We tried to combine similar goals. We wanted these goals to be concise, measurable, and something that we could work toward since our success will be measured by how we succeed against the goals that we set for ourselves. Some of the goals are already in progress, some are just changes in the "attitude in government", and others are farther reaching goals for the future. We are proposing that if accepted, these goals should be evaluated at least annually and at the end of our present terms. Please evaluate them and make any suggestions that you feel will improve them.*

# *Goals of the Current Allegany County Board of Legislators*

July 1995

Subject to annual review, revision, and acceptance by the Board of Legislators.

1. Work toward making County Government more "User Friendly".
2. Install a system of dry hydrants which will greatly improve fire protection outside of villages.
3. Organize an annual county wide clean up program June-August of each year.
4. Improve the system by which appointments are being made to the governing boards
5. Tax increase for 1996 not to exceed the annual rate of inflation, if any increase is necessary. Continue to look for creative revenue and financing alternatives to bring additional money into the County to keep down property taxes.
6. Explore and find a solution to the current space problems.
7. Work with the Intercounty to build a regional special detention facility.
8. Continue to help coordinate the County Comprehensive Master Plan that is being done through the efforts of the volunteer County Planning Board in cooperation with the town and village boards. This is a 3 year project that is about 1/3 done, and once complete needs to be reviewed by the Legislative board, modified, and then implemented.
9. Make necessary changes in the courthouse building so as to appease the NYS court system i.e. handicap accessibility, air conditioning, heating, and last, but not least security.
10. Increased lobbying efforts in behalf of the needs of the taxpayers in Allegany County.
11. Hold to a minimum any type of hiring increase. Implement a study to insure that the present work force is working efficiently. Continue to promote the departmental personnel evaluations to assist in this determination.
12. Establish a working policy for servicing, repairing, and replacing County vehicles and centralize car and truck fleet maintenance and repair.
13. Cooperate with towns and villages to decrease costs and improve services by eliminating duplication of services and equipment.
14. Change the heating system in both present complexes to increase efficiency and cut costs.

15. Development of County, State, and private lands for trails (horses, snowmobiles, cross-country skiing, hiking, etc.) to bolster our tourism industry. Also research the possibility for leasing county lands for the purpose of development for camps. These camps would be constructed under strict county zoning regulations.
16. Review our communications and data processing systems in our county offices to be sure we have a cost effective plan so Allegany County can stay in step in this ever changing field. Improve the County mapping by GPS or other means for County development and network the maps for use in all the departments such as Real Property, Emergency Services, Tourism, etc.
17. Form a consortium of business, education, and tourism to market the county effectively. A full time tourism director is needed to expand Allegany County's share of this market and to coordinate the efforts of this consortium.
18. Continue to develop and support the Job Trak Program and to promote the activities leading to welfare reform and employment training for "real" jobs in the private sector.
19. Develop and implement a program of recognition for our "exceptional employees".
