

**2015 Annual Report
Allegany County Forests**

The Allegany County Forests consists of over 2,000 acres of designated forest land. The County Forest is managed by the Soil & Water Conservation District for the sale of forest products, continued growth, wildlife habitat, and recreation. In 2015 the District utilized a District employee, Scott Alsworth to mark, cruise and manage the sale of county owned timber.

In 2015 cutting began on two county owned forest lots, the Weir and the C. Horner Lots in the Town of Angelica. Harvest will be completed in 2016.

Work continued on County Forest Land in 2015. The following property boundary markings were started Bennett and Coleman. We also continued working to reach a resolution for access to the Coleman Lot so that timber can be harvested.

Respectfully Submitted,

Scott H. Torrey
Executive Director, Allegany County Soil & Water Conservation District
